

WISE WOMEN FOR GREEN FUTURES

WISE WOMEN PLUMBERS
COOPERATIVE

Quarterly Newsletter

VOL.1

JANUARY 2024

WHO WE ARE

Empowering Communities, Transforming Environments: **Wise Women Plumbers Cooperative (WWPC)** envisions a future where women play a pivotal role in sustainable plumbing practices, fostering water reuse, environmental stewardship, developing green jobs for women, and creating thriving, equitable communities across Jordan.

OUR MISSION is dedicated to providing top-notch plumbing services with an unwavering commitment to championing the inclusion and empowerment of women in the traditionally male-dominated field. We extend beyond conventional plumbing solutions, actively contributing to water reuse initiatives, **creating green job opportunities**, and supporting environmental conservation efforts. Through skillful craftsmanship, community engagement, and an unyielding commitment to quality, we aspire to reshape the plumbing landscape for the betterment of our communities and the environment.
